

It does not include the tank

SADE-1000M KIT

USE:

- These kits are specially designed for the AdBlue/DEF supply to the vehicles from a 200-litre drum or a tank of 1,000 litres.
- Because of its base, the kit is easy to use and place; it can be placed in any type of tank or hung on the wall.
- The AdBlue/DEF supply kits are manufactured with materials compatible with this type of fluid in order to avoid damages, both in the liquids and its parts, which are in touch with it.

COMPOSED OF:

- Self-priming diaphragm pump
 - Flow: 30 l/min
 - Motor: 0.37 kW 230 VAC · 50 Hz single-phase · self-ventilated
- Metallic support with nozzle hanger
- 1.5 m transparent suction hose special for AdBlue/DEF
- 4 m Ø3/4" delivery hose special for AdBlue/DEF
- Universal zinc-plated hook set (adaptable to all type of tanks)
- Minimum working temperature of the kit: -10 °C

Available Accessories:

- MGE-40BLUE electronic meter special for AdBlue/DEF · Accuracy: $\pm 0.8\%$
- PT-60 Manual nozzle special for AdBlue/DEF
- PA-60U automatic nozzle special for AdBlue/DEF
- Suction kit for tanks of 200 and 1,000 litres (*Refer to Kit 1, 2 and 3*)
